

Loop 303 Outfall Drainage System (Woodlands Avenue to the Gila River)

24-Hour Construction Hotline: (602) 264-6416
www.fcd.maricopa.gov

About the Project

The Flood Control District of Maricopa County (District) awarded a contract to FNF Construction, Inc. to construct the Loop 303 Outfall Drainage System. The new outfall drainage system will collect and carry stormwater runoff to the Gila River and reduce the chance of property damage and flooding the future freeway and adjacent areas during a major storm event. Drainage improvements include construction of a concrete-lined channel, box culverts, storm drain pipe, retaining walls and landscaping. Additional improvements include street and irrigation system reconstruction for the Roosevelt Irrigation District (RID) and Buckeye Water Conservation and Drainage District (BWCD).

Construction Schedule

Construction will begin in October 2013 and project completion is scheduled for fall 2015. Construction work hours will be 6 a.m. to 7 p.m., Monday through Friday; hours will vary with seasonal changes. Construction crews may work evenings and weekends, if needed.

Traffic Restrictions

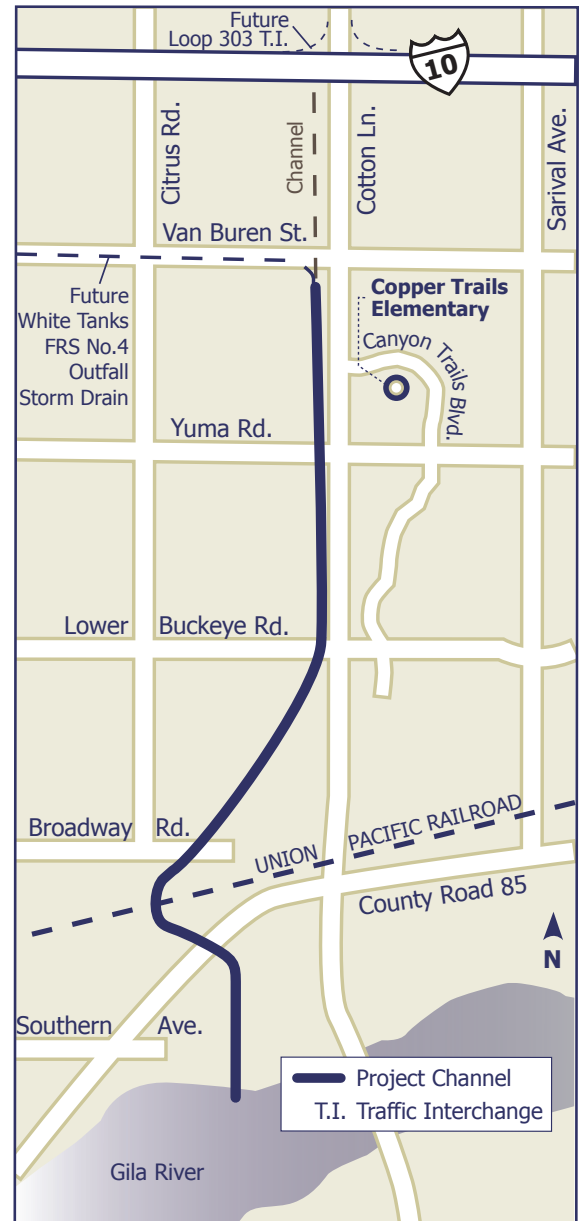

The majority of the work will take place off the roadway so traffic impacts should be minimal. However, expect construction trucks entering and exiting the construction area. Please allow extra time when traveling through the work zone as there may be traffic delays. Access will be maintained for residents, businesses and emergency vehicles at all times.

Thank you for your patience and cooperation.

For More Information

If you have questions or would like more information about the improvement effort, please call the 24-hour construction hotline at (602) 264-6416. We are happy to answer your questions and assist you in any way we can.
